Dear Readers:

A Leap Year is when the calendar year is extended to have 366 days - adding February 29th to the year, like this year.

A year is defined as the amount of time it takes for the Earth to orbit the sun one time. It takes about 365 days to do that. If you measure the exact amount of time it takes for the Earth to orbit the sun, the number is actually 365.242 days

By adding one extra day every four years, we take care of this extra quarter of a day.

This is why we have leap years that are one day longer than normal years. Even this doesn't work out exactly so there are extra adjustments made every hundred years.

Naturally Yours,
Mother Nature

Do you know what a group of frogs are called?

An ARMY of frogs

(How many of these do you know?)

(Draw a line from the group to the animals)

	A GANG
	A CONVOCATION
	A HOVER
	A DRAY
	A SLOTH

FEBRUARY

2008

Birthstone - Amethyst

Flower - Violet

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
27	28	29	30	31	1	2
3	4	5	6	7	8	9
10	11	12	13	14 Valentine's Day	15	16
17	18 President's Day	19	20	21	22	23
24	25	26	27	28	29	1

If you were born February 29, 2000
How old would you be this year?
Read this great book!
